

# ORBit: Move Energy Data from Everywhere, Anywhere, All at Once

Stonebridge  
A SIERRA COMPANY

ERP Implementation/Upgrades | M&A Data Integration | Complex Data Remediation | AI/Machine Learning

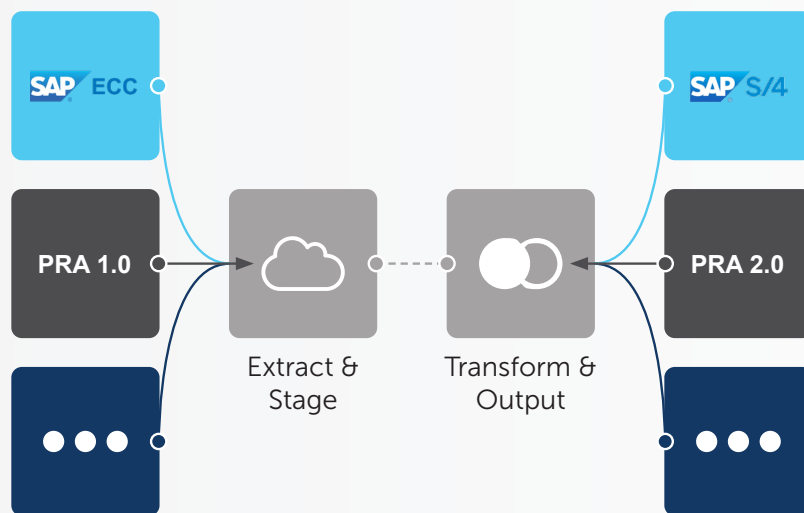

People-intensive data conversion for ERP-scale software implementation and upgrades accounts for half of time and material costs. And manually stitching large datasets together and reconciling numbers in Excel can delay time-sensitive M&A data integration, IT/business data remediation, and AI initiatives that run on big data.

ORBit changes the big data transformation game. Cut project costs by 50% and empower your team to manage even the most complex SAP S/4HANA data migrations involving SAP FI, PRA, JVA, and EPPM.

 50+  
Pre-built Data Connectors

 70%  
Data Footprint Coverage

 50%  
Lower Project Costs

## ORBit At a Glance

- 1 **Extract** data from many disparate sources with 50+ pre-built ERP and energy-specific software connectors.
- 2 **Load** Vast volumes of data into a cloud-based staging data warehouse for lightning-fast transformations.
- 3 **Transform** large datasets into seamless business objects with powerful merge tools and business rules.

ORBit delivers powerful enterprise data management capability via Data-as-a-Service (DaaS) and fixed subscription pricing no matter the size of data volumes.

## Pre-Built Connectors

Access up to 70% of your existing data footprint with ORBit's library of connectors. Or build your own integrations with drag and drop simplicity via API and custom database queries for Oracle, SQL Server, and MongoDB.
